

## Promoting informatisation in primary and secondary schools

In 2013, our operations at all levels took the initiative to contact primary and secondary schools in respective regions and provided a range of solutions for schools in various areas, including the construction of informatisation infrastructure at primary and secondary schools, informatisation of education management, provision of digital education resources services, construction of and training for the professional team for the informatisation of education, launch of pilot testing programmes for the informatisation of education and the research and development of information technology and the promotion of the use of IT solutions and applications.

During the year, the Company installed a total of 27,000 new broadband lines and upgraded 36,000 existing ones at primary and secondary schools to further promote the “school-to-school” broadband connection. To fulfill the schools’ needs to share quality education resources among different classes, the Company introduced the use of the “class-to-class” application. In addition, the Company worked together with the education departments to promote the “people-to-people” internet learning space and implement the construction and operation of the cloud computing platform for digital education resources. The Company also worked together with the education departments to launch an informatisation training programme for teachers and professional teams to improve the IT skills of people working in elementary education units. One of the major campaigns “10,000 roadshows for campus informatisation” served more than 100,000 teachers in the region. The Company also supported the education departments in their pilot testing programmes for informatisation of education and helped to complete the construction of more than 4,300 “smart campuses”.

## IV. Fulfilling our responsibility towards our employees

We consider our employees to be our most valuable resource. The Company adheres to the principle of respecting people and cherishing every employee. We value various types of professional and technical staff and seek to align the development of the Company with the staff. In accordance with relevant state laws and regulations, we safeguard the interests of our employees and focus on the establishment of harmonious labour relations. We support labour unions in carrying out their functions and encourage our employees to participate in management and protect their rights to be the master of their own affairs.

In 2013, we continued to carry out production safety publicity and provide education and training to implement our production safety accountability system and safety management system. We continued to improve the working and living conditions of our frontline employees by expanding the coverage of the “Four Smalls” initiative, namely, small canteens, small bathrooms, small washrooms and small activity rooms at the workplace, which will be extended to other frontline units such as the sales outlets, “10000” call service and the installation and maintenance service providers. The Company persisted in determining employees’ remuneration based on their value and contribution and continued to tilt in favour of frontline employees, which resulted in the steady increase of their income.

In 2013, we increased our efforts in staff training to fulfil the strong development needs arising from our business expansion, with the number of attendees for professional training increased by 6.2% from 2012. The Company provided more support for the training of frontline employees and launched the campaign

to deliver training to frontline employees, with a focus on training the frontline employees in marketing units, especially managers in our county offices, in order to enhance their management skills. The Company trained and accredited employees responsible for frontline marketing and services, installation and maintenance as a total of 82,000 counts of employees went through the accreditation process. The Company organised a number of skills competitions and set up multi-level innovative workshops to establish an on-the-job innovation platform to encourage our employees to improve their innovative and technical skills. Employees were also encouraged to share their knowledge, experience and skills, and help each other to improve their technical skills and practical experience. Caring for the spiritual well-being of our employees, the Company established the “China Telecom Employees’ Honours System”, a system that contained different classes of honours with extensive coverage. Being both guidance-driven and sustainable, the system aimed to increase the employees’ own values and encourage them to continue to pursue excellence.

China Telecom continued to provide the best support for our employees who were in difficulty. The Company set up a permanent mechanism to offer comfort to its employees, with a support mechanism to help all employees who might be from different regions and in different situations to solve their practical difficulties and problems. In 2013, the Company launched a campaign to raise over RMB22 million for employees in Ya’an, Sichuan, who were affected by the earthquake.

### **V. Fulfilling our responsibility towards the environment**

China Telecom has established the concept of “Low-Carbon Telecommunications and Environmentally Friendly Development” and is committed to being an “Environmentally Friendly Integrated Information Service Provider” by further promoting energy saving and emission reduction in the areas of procurement, construction and operations.

In 2013, we accelerated the promotion of an energy consumption monitoring system. With the sub-division of performance evaluation units, the Company examined energy usage in greater detail and applied norm management to improve the precision management of energy saving and emission reduction. We steadily promoted operations under an increased temperature in our facilities, raising 55% of our mobile network base stations to 28 or 30 degrees Celsius and thereby saving more than 100 million units of electricity for the year. We continued to upgrade the technology to reduce energy consumption in our infrastructure. During the year, we built around 4,000 intelligent ventilation units, and completed the construction of approximately 6,000 sets of e-green power switches and approximately 1,500 intelligent heat transfer devices. Energy saving technology was used in 41% of our facilities, 9 percentage points higher than 2012 with around 150 million units of electricity being saved for the year. The Company comprehensively promoted a more energy-saving and reliable 240V DC power supply system, with more than 400 units put in use in 2013. Energy consumption in our telecommunications networks was effectively controlled during the year.

In addition to the promotion of environmentally friendly operations, the Company continued to develop and promote the environmentally friendly information products to help our customers' energy saving and emission reduction, as well as our environmentally friendly development.

Furthermore, to avoid redundant construction and improve the efficiency of telecommunications infrastructure, the Company cooperated with its parent company and various telecommunications operators to jointly construct and share the Internet infrastructure. It also helped to protect the natural environment and landscape, and reduced the use of land, energy and raw materials.

## **Implementing Energy Performance Contracting**

Energy Performance Contracting, or EPC, is a new market mechanism for energy saving operations, whereby the fees saved by lower usage of energy are used to pay all the costs of the energy saving project.

In 2013, the Company achieved a new breakthrough in upgrading the technology to save energy by utilising EPC, while effectively supporting the upgrade of its infrastructure and network equipment. As at the end of 2013, 19 provincial branches of China Telecom deployed external funds of approximately RMB170 million for 382 EPC projects, saving approximately 77 million units of electricity for the year.

## **VI. Contributing to Community Well-being**

China Telecom was consciously involved in social welfare undertakings. Through various forms of public service activities, we supported the development of science and technology, education, culture, sports and health undertakings, cared for vulnerable groups in society and helped those in distress and poverty. We advocated and encouraged our employees to foster the volunteering spirit and participate in various forms of voluntary service activities. In 2013, we continued to assist our parent company with promoting poverty alleviation and assistance in Tibet. We participated in a variety of assistance programmes in Bianba County, Tibet, and in Yanyuan County and Muli County, Liangshan Yi Autonomous Prefecture, Sichuan.

The Company assisted with projects in relation to infrastructure construction, informatisation, education and training, agriculture, health and science and technology. Together with the Ministry of Education, the Company jointly launched a campaign known as “e-Surfing School Care for the Unattended Children” together with mainstream media to raise public awareness of unattended children, covering two million unattended children scattered in 4,000 schools in eight mid-western provinces.

In 2014, China Telecom will proactively take the initiative to develop a coordinated approach to fulfil its responsibility towards its stakeholders. As an integrated information service provider, we will help to improve the livelihood of the people, implementing industrialisation, informatisation, urbanisation and agricultural modernisation. We will assist with restructuring and developing the national economy, while using our best efforts to create value in our business for stakeholders. We will also strive to make new contributions to the sustainable development of our economy and society.

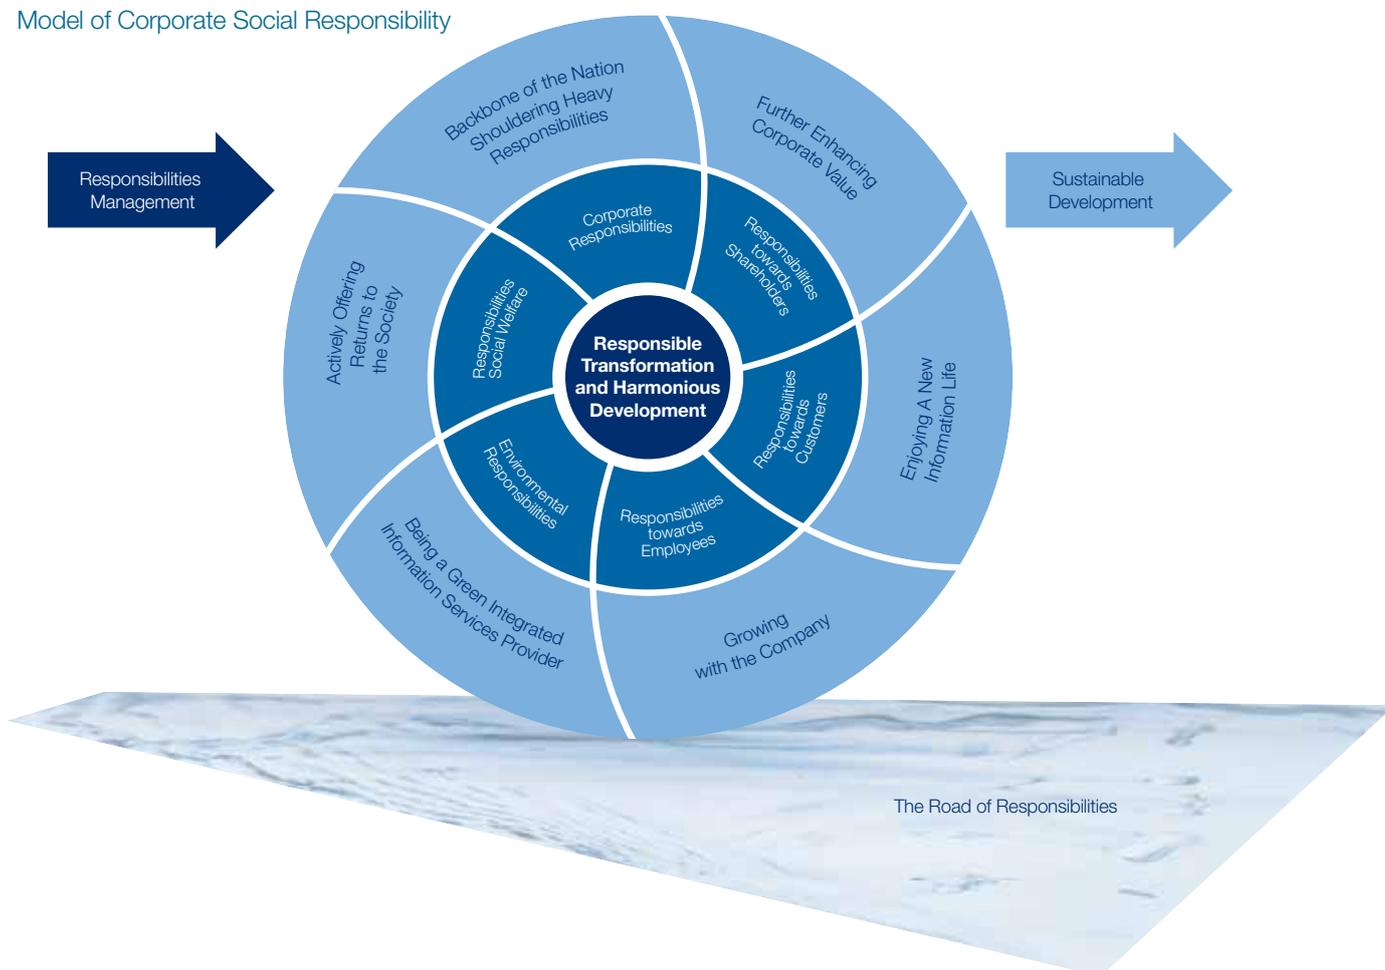

China Telecom successfully commenced the e-Surfing 3G services in the Antarctic

# Corporate Social Responsibility Report

By adhering to the core philosophy of “comprehensive innovation, pursuing truth and pragmatism, respecting people and creating value all together”, China Telecom persevered in the fulfillment of its responsibilities to stakeholders, further promoted enterprise transformation and continued to enhance its comprehensive corporate value. In 2013, China Telecom was ranked 14th in “Fortune China CSR Ranking 2013” by *Fortune China* magazine, which jumped from its previous ranking of the 39th. China Telecom was also first accredited as one of the “Top 25 Most Responsible Companies”.

Model of Corporate Social Responsibility

---

## I. Operating with integrity and in compliance with the laws

The Company persists in operation complying with the laws and integrity, through complying with relevant laws and regulations, industry regulations and business ethics. We have established an all-rounded and seamless compliance system featuring legal education, strengthening internal control, audit supervision, anti-corruption and comprehensive risk management. We have created a lasting, effective and standard communication mechanism in order to regulate the disclosure of corporate information. We have taken the initiative in receiving government regulation and social supervision. In 2013, we continued to strengthen system construction, supervision and inspection, and made timely rectification when problems were discovered.

## II. Fulfilling our essential responsibilities as a telecom operator

China Telecom regards the construction of complete and comprehensive basic networks, developing universal telecommunications services, guaranteeing emergency communications, maintaining information health, promoting indigenous innovation and facilitating industrial development as our inherent responsibilities.

## Implementing the e-Surfing 3G network coverage in rural areas

Extensive areas of the rural territory in China have been covered by the 3G network of China Telecom. In 2013, the Company continued to improve the mobile networks in rural areas as well as the road network. As at the end of 2013, the 3G network covered 35,400 rural towns, enabling more residents in rural areas to use information services via the 3G network.

## Promoting the “Broadband China • Fibre Cities” project

As a key player for constructing China’s broadband network, during the three consecutive years since 2011, China Telecom further accelerated the construction of broadband infrastructure by promoting the FTTH construction in urban areas and applying customised techniques in broadband network construction in rural areas to speed up the installation of broadband lines in administrative villages.

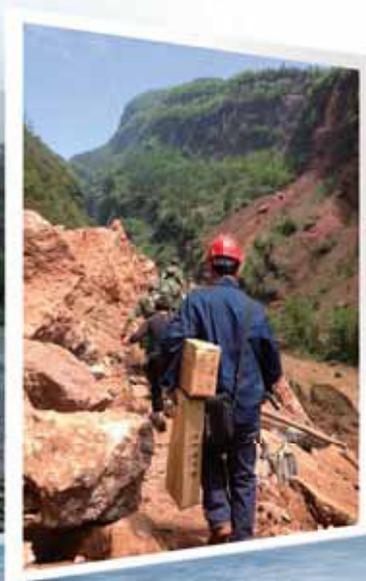

As at the end of 2013, the coverage of China Telecom FTTH reached approximately 84 million households. The number of FTTH subscribers was close to 27 million. The number of wireline broadband subscribers was over 100 million. Over 290,000 administrative villages in 21 provinces in Southern China installed broadband lines. 80% of China Telecom wireline broadband subscribers used bandwidth products with 4Mbps or above.

## Progressing the “Village-to-Village” projects

China Telecom continued the implementation of the “Village-to-Village” projects to speed up the construction of service outlets in rural areas and raise the standard of informatisation for township governments, agricultural enterprises and individual farmers and bridge the digital divide between cities and the countryside. In 2013, the installation of broadband lines in over 6,800 administrative villages and over 1,600 natural villages was completed.

## Securing emergency communications

China Telecom is dedicated to securing smooth national communications. In 2013, there were a number of natural disasters in China, such as the Ya’an earthquake, typhoons and floods. The Company quickly responded and took initiatives to restore communication services in the affected areas. Throughout the year, a total of 118,600 counts of relief workers, 27,500 counts of rescue vehicles and 1,300 counts of emergency communications equipment were deployed for this purpose. A total of 4.2 billion free SMS messages were sent. The Company successfully accomplished the communications support tasks of important events such as the Chinese National Games, Asian Youth Games, China-Eurasia Expo and China’s Antarctic expedition.

Mr. Wang Xiaochu, Chairman of the Company, led the disaster relief works against the earthquake

The relief team of China Telecom carried equipment and tools for emergency relief works

### III. Fulfilling our responsibilities towards our customers

Adhering to our operation philosophy of “pursuing the mutual growth of corporate value and customer value”, and the service philosophy of “Customer First, Service Foremost”, China Telecom strives to protect the interests of customers according to the law. The Company also strives to understand our customer needs and provide suitable, easy-to-use and value-for-money products for all our customers, including individuals, households, corporations, government or social undertakings. With customer perception as a starting point, the Company continues to perfect our service and enhance its service quality, so as to enable our customers to fully enjoy a new informatisation lifestyle.

#### Implementing the campaign to tackle common service issues

In 2013, in association with the mass line education and implementation campaign, along with the correction of unwholesome tendencies in the industry required by the Ministry of Industry and Information Technology, China Telecom rectified a number of common service issues, enhancing service management and improving the long-term mechanism against these issues.

In response to customer complaints about the business practice of some of the subsidiaries of the Company such as involuntary service suspensions, compulsory bundled services and forced subscription, China Telecom carried out a series of measures to enhance its control and management. By increasing our efforts in centralising and marketing packages, the Company tackled the issues from the source. We also overhauled the provisions in our promotion package plans or other additional plans, the security settings of the related marketing systems and the access control systems, and rectified issues immediately after they were discovered. The Company regulated the marketing of

value-added services, prohibited forced subscription, strictly applied the re-confirmation for services, and imposed strict and severe punishment on violators. In addition, the Company required the sales outlets to ensure the sales of single product, and banned the practice of product bundling.

In response to customer complaints about the major problems in the installation and maintenance of broadband lines, China Telecom implemented a series of measures to regulate the provision of these services. The Company enhanced the management of installation and maintenance services to ensure timely delivery of such services. With a better allocation of resources, the Company managed to improve the booking system, and bring in more efficient service providers to better support and improve the work flow. The standardisation of the installation and maintenance service providers was implemented to improve the quality of their services. Metrics related to customer perception of the quality of the installation and maintenance services were improved to better evaluate service quality and to align the performance of the installation and maintenance service providers with customer perception.

In the 2013 customer satisfaction assessment organised by the Ministry of Industry and Information Technology, the broadband and 3G Internet services provided by China Telecom were recognised as having maintained a leading position in the industry. Our internet service was awarded the “Best New Media Service” for the year by *China Business News*. Our Weibo customer service was shortlisted for the “Top Ten Weibo Operations” by the State-owned Assets Supervision and Administration Commission of the State Council. China Telecom was named among the “Top Ten Units of Customer Service” in the Sixth Congress for the Assessment of After-sales Services in the country organised by the China General Chamber of Commerce and the China Foundation of Consumer Protection.

# Human Resources Development Report

---

In 2013, in accordance with the overall strategy of “De-telecom”, “Market-orientation and Differentiation” and “Three New Roles”, we firmly adhered to the principle of “supporting development and serving our employees”, and grasped the overall idea of laying down a strong foundation of team building and constructing a mechanism for promoting further development. Leveraging on the human resources planning, the Company further enhanced its building of teams of management, professional technicians and innovative talents and increased its efforts in mechanism innovation for human resources management, which have pragmatically protected the rights of its employees and effectively supported its business development.

Firstly, the Company built a value-based human resource planning system. Modelled on the supply value chain concept, a value model of China Telecom human resources was built to include key performance indicators for enhancing the value of its human resources management, and to establish strategic, operating and supporting systems for human resources management. As such, the Company has formulated the key performance indicators, major tasks and key measures in relation to human resources management from 2013 to 2016, which have effectively improved the vision and rationality of the human resources management of the Company.

Secondly, the Company improved the management of our executives and strengthened our senior management team building. The Company initiated a consolidated performance assessment for management in a move to enhance the appraisal system. The enhanced appraisal system further strengthened the use of the evaluation results in the selection, appointment and training of management personnel. We also sped up outstanding young leaders’ promotion and improved the selection and appointment process by promoting a total of 33 employees to leadership positions in a higher rank through the elections and open recruitment organised by the Company during the year, which further optimised the age mix of our management team. In addition, the Company proactively promoted a job exchange program among executives to enhance their leadership skills and all-round capabilities through a multi-job training. In 2013, 20 executives participated in the program.

Thirdly, the Company strengthened its efforts in building a team with innovative talents. To foster the building of a team with innovative talents, the Company created an incubation centre and introduced a creative management and operating system with a market-oriented approach, so as to create an incubation environment for new business development teams and an incubation system that would clear the way for their corporatisation. Over the last two years,

## Three New Roles

-  Leader of Intelligent Pipeline
-  Provider of Integrated Platforms
-  Participant of Content & Application Development

the Company has separately selected 68 innovative projects in four batches for further development at the incubation centre. Under the promotion of this “professional incubation + entrepreneurial guidance + angel investment” incubation model, the Company has currently realised the corporatisation of 18 innovative projects, with the number of employees in the new business development teams reaching 276.

Fourthly, the Company promoted innovative human resources management to support our services development. We increased our efforts in developing pilot schemes for the transformation of our human resources management. Through the pilot schemes, the Company enhanced the efficiency of its human resources management through optimising the employee structure, controlling the total number of employees and creating a differentiated remuneration distribution mechanism. For the development of its emerging services, the Company has set up a program for gathering and nurturing talents for its emerging services while actively exploring the human resources management practices for the mobile Internet services.

The management expressed greetings to employees

Lastly, the Company actively implemented the new Labour Contract Law of the People's Republic of China which regulated the use of labour force by enterprises. The Company carried out a comprehensive research on the new Labour Contract Law of the People's Republic of China, set up guidelines for its service operation model, proposed structural adjustment to its personnel,

put forward the principle of "equality of remuneration and work" and the standardisation of outsourcing arrangements. Based on the new Labour Contract Law of the People's Republic of China, the Company proactively implemented the principle of "equality of remuneration and work" with self-regulation, which effectively limited the risks of the use of labour force by the Company.

## Information of Employees

As at the end of 2013, the Group had 306,545 employees. The numbers of employees working under each classification and their respective proportions were as follows:

	Number of employees	Percentage
Management, Finance and Administration	49,113	16.0%
Sales and Marketing	157,915	51.5%
Operations and Maintenance	97,264	31.7%
Research and Development	2,253	0.8%
<b>Total</b>	<b>306,545</b>	<b>100%</b>

## Corporate-Employee Relationship

### Communication between Management and Employees

The Company established a feedback system to systematically understand and know the employees' views as well as promoted a close-end management system to handle the requests and concerns of the employees. In 2013, the Company's management and labour union leaders made over 60 visits to over 200 employees, including those who were in difficulty as well as the outstanding employees. To understand the views of the employees, the Company also introduced a third party survey involving over 7,000 employees in eight provincial branches to investigate their stress conditions as well as the sources and impacts of their work stress and the channels for relieving such stress. We have also timely understood and grasped the issues expressed by the employees, and actively reflected the demands of the employees by making proposals and recommendations to the Company.

### Roles and Duties of Labour Unions

Our labour unions persisted in the principle of "serving both corporate development and the employees' growth".

**We established an honours system for the employees.** Based on the unified standard that adopted different layers and classifications and frontline-orientated incentive development principles, the Company researched and developed the "China Telecom Employees' Honours System" which established a multi-level, comprehensive, guidance-oriented and sustainable honours system and brought about deepened incentives for the employees. The honours system, together with the position and remuneration system, formed a differentiated incentive mechanism.

**We created a platform for the on-the-job innovation activities of employees.** Based on a low entry barrier, wide coverage, easy to replicate and long-term incentive approach, the Company actively created a platform for the enhancement of the employees' job innovation and capability, which further promoted the on-the-job innovation activities of the employees.

**We created an ambience of innovation.** The Company introduced an exemplary promotion convention in 2013 to award excellent quality and spirits. In 2013, two employees were awarded the "National May 1st Labour Award" while five received the "National May 1st Labour Medal"; 12 units were awarded the "National Pioneer Workers"; 14 units were awarded the "State-owned Pioneer Groups", with 25 workers being awarded the "Outstanding Workers"; 50 units were awarded the "Enterprise Pioneer Groups", with 97 workers being awarded as "Outstanding Workers"; nine employees were named as "Technical Master of China's State-owned Enterprises" while 24 were named as "Technical Master of Enterprise". To promote exemplary pioneer workers on a regular basis, the Company increased the intensity in the promotion of more than 80 frontline outstanding employees and over 10 teams. The Company actively created an ambience of advocating, learning, competing and caring for these pioneers in order to incentivise its employees to continue to pursue excellence.

The Company also offered guidance to the labour dispatch entities and labour outsourcing entities for them to establish labour unions and their employees to join the unions, in order to motivate employees' passion to participate in and support corporate development. As such, the union enrollment rate of the employees has reached 97%. The Company actively developed activities to build home for the employees and 14 provincial labour unions were named as the "Home for National Outstanding Workers".

## Coordination and Communication between the Company and the Labour Unions

Over 700,000 counts of employees participated in three new business development competitions, which included network enhancement labour competition to improve network quality, a four-stage technical skills competition and the network security competition organised by the Ministry of Industry and Information Technology. The Company has also organised an on-the-job innovation training program for frontline employees, setting up a learning and exchange mechanism and promoting multi-level innovative workshops. To date, there were over 60 innovative workshops that aimed to speed up knowledge sharing and to transfer excellent experience and techniques. A win-win situation was attained for both the Company and the employees by enhancing the employees' technical skills, business skills, practical experience and their passion for innovation.

## Caring for Employees

**We deepened the implementation of the “Four-Small” initiative.** The Company included the operating cost of the “Four-Small” initiative into its budget management to enhance its operating efficiency. The area of coverage of the “Four-Small” initiative was extended to different frontline operating units such as sales outlets, “10000” call service, and the installation and maintenance teams such that 80% of the frontline units implemented “Four-Small” initiative and employees of these units managed to benefit from such initiative. In addition, more were added to the “Four-Small” initiative to target different employees in different zones and different situations so that their actual difficulties and problems can be tackled immediately. The Company also adopted several measures to alleviate the stress of its employees.

**We established a regular mechanism for employee visits.** During the New Year and Lunar New Year holidays, the Company's entire management team visited frontline units in 17 provinces (districts and prefecture-level cities) to show their care for the employees. The management of the Company, labour union leaders and staff often found time to visit employees who were in difficulty as well as the outstanding employees when they were in their regions.

**We cared for our employees in the affected regions and regions with severe conditions.** The Company raised over RMB22 million for employees who were affected by the Ya'an Earthquake. In addition, a special relief fund of RMB1 million was allocated to the labour union in Sichuan province to assist the employees in the affected regions. RMB1.7 million was allocated to the affected employees in Gansu province as allowances for their families. The Company also allocated RMB12.1 million to frontline employees at 16 provincial branches as the "Cool Summer" subsidy. The Company also organised six sessions of study and field trip activities that promoted "Hand and hearts filling the love of China Telecom" for the employees that provided continued services during Ya'an Earthquake and an exchange program among the excellent employees working in areas with severe conditions. 186 outstanding employees participated in the activities.

**We conducted activities to boost morale and team work.** China Telecom organised a balloon volleyball tournament for its employees. China Telecom also took the trophy of the balloon volleyball competition organised by the China Telecommunications Sports Association. An internal photo competition organised

by the Company attracted over 3,000 submissions which enriched the Company's mobile photos archive. A national photography exhibition co-organised by the Company, the Popular Photography Magazine and the terminal company attracted over 60,000 entries, which successfully raised the branding of our "e-Surfing" service. Provincial labour unions organised over 50 arts and sports activities that not just enriched the employees' cultural life, but also raised their morale and team spirits.

## Strengthening Human Capital

Focusing on our strategic development priorities, the Company continued to strengthen the development of talent teams, and actively promoted the capabilities improvement of our operation managers, professionals and technical personnel.

## Developing Leadership Skills

In 2013, we organised and launched four phases of leadership training sessions for the management from the headquarter and provincial branches, two phases of leadership training sessions for prefecture-level management and a training session for the newly appointed management executives, with a total of 502 counts of managers attending the training sessions. The Company also actively sent management personnel to attend various trainings for high-level talents. In 2013, a total of five general managers from the provincial branches attended the leadership training organised by the China Executive Leadership Academy, Yan'an, and China Business Executives Academy, Dalian, while 10 deputy executives from the headquarter attended the

elective sessions for senior management. To fully utilise the functions of China Telecom College, the Company provided training for the new executives with emphasis on leadership training. To leverage on the strength of the online university, the Company set up special learning zones for managers to learn about the new technologies and new businesses. The Company also actively explored the training model for the reserved management, initiating a pilot scheme known as “entrepreneurial training camp” which was used as a basis to stimulate new thoughts among the reserved management team.

## Cultivating Professional Talents

To fully utilise the professional talents based on the Company’s corporate focus, the Company has developed an annual work plan for each group of professionals in order to nurture their talents. In 2013, the Company organised 11 training sessions for Rank B talents under seven categories, including sales and marketing, IP, IT, wireless and mobility, core network, optical transmission and access as well as platform, with a total of 699 counts of senior professionals attending the training and a coverage ratio of over 95%. During the period, the Company examined 385 Rank A and Rank B talents specialised in IP, IT/ICT and sales and marketing, of which 110 were awarded with distinction.

## Enhancing Employees’ Skills

The Company actively commenced frontline employees’ skills training and skills certification. In 2013, in order to support the overall strategy of “De-telecom”, “Market-orientation and Differentiation” and “Three New Roles” the Company focused on the key business development areas and held 187 training sessions

covering various areas, including marketing, products, sales services, corporate informatisation, maintenance and service support, network development and construction and integrated management, with 13,000 attendees in total, up 6.2% from 2012. The Company also organised and conducted skills certification for nine types of skills such as channel management, corporate informatisation, and customer service. A total of 82,000 counts of employees participated in the certification examinations. In line with the Group’s efforts to sub-divide performance evaluation units, the Company emphasised on the training provided for channel managers, secretaries of rural bureaus and self-managed TOP shop managers. In relation to our key businesses, the Company initiated trainings with an emphasis on relationship marketing of informatisation application in the industry and trainings to enhance supporting capabilities of key informatisation application. In addition, the Company also focused on the frontline employees and organised frontline training, as well as training on the mobile operating system and other professional training activities focusing on particular models. These training sessions fully enhanced the business techniques of frontline employees.

Looking forward, the Company is keen to build a team of talents and further enlarge the talent reserves for emerging services. In 2013, the Company recruited approximately 6,400 fresh graduates, 71.6% of which were majored in communications, computer engineering, sales and marketing and information operations management, up 11 percentage points from 2012. The Company continued to recruit top graduates for the available positions, with over 1,000 top graduates being selected in 2013, and a total of approximately 3,400 top graduates being trained in the past three years.

## Remuneration and Performance Management

The remuneration of the Company's employees comprises base salary and performance based salary, and takes into account both short and medium-to-long term incentives. In 2013, the Company implemented the "Position and Remuneration System of Full Services Operation", instructing each business unit to gradually implement the system based on trial-run results. Furthermore, the Company persisted in determining the distribution of employees' remuneration based on their value and contribution while tilting towards the core frontline employees. At the same time, to facilitate the introduction of sub-dividing the performance evaluation units, the Company introduced innovative distribution mechanisms to motivate and incentivise its employees. Through measures such as market mechanism, shop owner responsibility system and tender underwriting, the Company managed to delegate responsibilities, allocate key resources and run independently with consistent rights and responsibilities. These

measures unified the interests of promoting corporate development and the individual interests of employees. By directly linking up the employees' salary level with their performance evaluation results, the Company encouraged its employees to be more productive so that they could fully realise their individual value and achieve a higher remuneration level while working for the company.

To continuously improve the model for classification and allocation of labour costs, the Company adopted a flexible budget control policy for provincial branches which proportionately matches income with labour cost such that more allocations were made to units with a higher level of revenues and vice versa. The Company continued to enhance the correlation between revenue and labour costs in terms of labour cost allocation and raise the allocation ratio in accordance with profit-linked efficiency. Furthermore, the Company continued to apply reduction rules to the labour costs incurred by the provincial branches that failed to meet the profit budget amounts, which ensured that the labour cost allocation

Continuously enhancing the technical skills of employees through organising a series of competition

mechanism fitted well into business development of the Company. The Company also applied value deposition and development cycle to manage its direct subsidiaries and professional companies and implemented a differentiated model for classification and allocation of labour costs.

At present, China Telecom has established a relatively comprehensive employees' performance evaluation system. Branches of all levels have established employees' performance evaluation teams which are led by the respective general manager of the relevant branch. The teams have formulated evaluation methods for deputies, functional departments, subordinated units and general employees. In 2013, the Company managed to further improve its employee evaluation and incentive mechanism and related supervision system to secure the fairness and reliability of the performance evaluation results. At the same time, it

has further optimised and improved the performance evaluation system to appraise the performance of business units, deputies, middle-level management and employees at different levels, enhancing the specific focus and relevance of the entire performance evaluation process.

## **Guaranteeing Employee Welfare**

The Company strictly abides by the laws and regulations such as the "Labour Law of the People's Republic of China" and the "Labour Contract Law of the People's Republic of China" to regulate its employment practices. The Company offers equality of remuneration and work, implements special regulations to protect female employees' rights and interests, and there were no gender discrimination policies or regulation, and there had been no circumstance whereby child labour or forced labour was employed.
